The Contrast. Before the Presidential election the Republicans professed great love for the foreign born citizen. Comment. H. Wister Davis, a Maryland Know Nothing, gets the mission to Russia. Cart. Scherz, an eloquent German orator—a man have gone on among well meaning men for more to whom the Republican party is largely indebted than two centuries. For the whole of this time, for its success, the Cincinnati Commercial, Repub lican authority, says, is snubbed by the Sawarp. Lincoln Administration. Such is the love of the olence, have been resorted to by good men in the Republicans for the foreign born citizens after the slave States, to make the experiment successful, election!

A New Weapon.

The Cincinnati Gazette has invented or sugcontroversy would be settled in sixty days, and the other, while on his journey from Springfield to Washington, pronounced the "crisis an artificial one," and he couldn't see that any body was hurt, or that anything was the matter.

Tribune, of Saturday last, contain the following

This suggestion is somewhat significant. It appears that the Administration has not yet decided whether to treat the seceding States as in or out of the Union. Seward, Lincoln & Co., want a month's time to determine that question and it is not worth while for the newly appointed Ministers to leave the country until the Administration have concluded whether it will recognize the Southern Confederacy as an independent government, or as still a part of the Federal Union. -homes, too, in which they were raised-the So we will have to wait a month for honest OLD highest price for labor awaited every one of them Ask to make up his mind whether the Union is split beyond hope of reconstruction or to try the —the avails of their labor were secured to them virtue of Spalding's glue in mending the crack.

"Have we a Government!" The Detroit Free Press says it is not our busi-ness to defend Mr. Buchanan's administration, and if it were we should find it an awfully up hill liament, (by abolition members sent in different business. But we protest against the organs of Mr. Lincoln's administration throwing the resonal examination) that the export of sugar in a short time had fallen off from upwards of six sponsibility of the evacuation of Fort Sumter upon Mr. Buchanan. It does not belong there.

The reason of the evacuation, we are told, is, that the President can not command sufficient military power to reinforce and hold the fort. Whose fault is it that he has not this power?

Clearly not Mr. Buchanan's. It is clearly the fault of the late Congress, both Houses of which the constant of the members of the product of labor had shared the same fate. That the farms had grown over in bushes—that the ditches were filled up—that the roads were impassable—that the machinery was rusting and rotting unused—that the houses were surrounded with brushwood and trees that nearly concealed them—that thousands of negroes were hovering around the towns on the coast in destitution and around the towns of the coast in destitution and around the towns of the coast in destitution and around the towns of the coast in destitution around the towns of the coast in destitution and around the towns of the coast in destitution and around the coast in destitution around the coast in destitution around the coast in destituti were Republican after the withdrawal of the mem-starvation, whose existence was a mystery, as bers from the seceded States. This Congress uone could account for it—that others had rewould not have military force enough at his com-mand to hold that or any other fort in the seceded that no price would secure labor. That the value the mountains, where they were living in savage States. Why it did not furnish him with this force we are not able to say. We leave the explanation of that matter to the Republican newspaper organs. What we want, in this connection, re-assumed by their well meaning but misguide s, that each Administration-that of Mr. Bu-The second experiment, to which allusion has been made, is the one in Africa. The best major its own bottom; and if they shall so stand, it is altogether probable that Mr. Buchanan's will United States were selected for this experiment.

appear quite respectable in contrast. If it shall so appear, what an Administration will Mr. Lincoln's be!

The evacuation of Fort Sumter has been ordered, not as a measure of conciliation, we are assured, but as a necessity. There would have dered, not as a measure of conciliation, we are assured, but as a necessity. There would have been some honor in evacuating it as a peace offering, but to evacuate it as a necessity is indeed humiliating. Such is the first act of Mr. Lancoln's Administration! Of course the evacuation of all the other Southern forts must follow, not as measures of cenciliation, but from necessity. The Republican Congress did not arm the President with power to hold these forts, and the President has not the courage to call the new Congress promptly together that it may arm him with that power. Thus far, it may arm him with that power. Thus far, continent a territory large enough for the United certainly, the Buchanan Administration grows States.

We trust that the Republicans in Congress and out of it, and those Republican journals who Ham's descendants in the United States as were have been so anxious to know whether we have a most advanced in civilization, public spirit and ingovernment, will now answer their own question. telligence. Gentlemen, have we a government? thropists to succeed in this experiment, that through their influence, indirect aid was obtained from the Federal Government, to sustain the

How it Works.

It is reported that importations of foreign goods, free of daty, under the operation of the Southern tariff, are being landed at St. Louis from New Orleans. The attention of Secretary Chase has been called to the fact, and it is stated that he will attempt to enforce the collection of Federal duties in all such cases. This is but the beginthere—lands surveyed and ready for settlement —hospitals for the sick, and medical aid for the rassistance—were all thoroughly arranged ning of the difficulties which will follow the en- and secured to them by those noble hearted men. forcement of the contending revenue systems of But the above catalogue of bounty falls far federacy. The unrestricted navigation of the Mississippi river is also involved in the controversy. thought which characterized their ellorts. The society and its influence secured for the colonists all kinds of tools to cultivate their fields, carts The people of the Northwest will never submit and wagons for the use of their farms; steam to any embargo upon the commerce of this great highway, whether it is imposed by the North or the South. Their sympathies are for free trade defend their persons by land, and ships for their -free commerce—and they will not long submit commerce by sea.

They provided for them a government free of interests of New England and Pennsylvania at the sacrifice of their own. It will cost the Federal Government more to collect its Bibles and preachers to teach them the way to headuties and enforce its revenue system, than the revenue will amount to if it should attempt to clothing for their bodies—and affectionate and collect duties upon importations which may come hrough the Southern Confederacy whether by the Mississippi river or the artificial channels of God for their success, and followed them to their the Mississippi river or the artificial channels of new homes, in every form of benevolence. Our transit which connect the North with the South.

The Republican tariff policy is the very worst measure which the Republicans could have adopted in the present exigencies of the country, and if persisted in, will do more to create a sympathy in the North-west with the South, then anything Christian civilization. the latter could do to effect that end. In the adoption of this insane measure the Republicans have demonstrated their incapacity to govern been selected on the globe, to guide their infant movements in the mission of self-improvement ces which surrougd them. They seem determined to work out their own destruction, and we -who had been so long accustomed to progress certainly wish them success in that object.

on this continent, were slow to doubt the The Emancipation of the Mussian furnish, that its success was doubtful. Whether ondon Spectator, in an article on the ion of serfs in Russia consummated on the present month, predicts, as one of the 3d of the present month, predicts, as one of the necessary results of the movement, the temporary extinction of Russian aristocracy. This body, numbering in the aggregate about one hundred thousand slaveholders, derive almost their entire wealth from the serfs they possess. This of land cultivated in this agricultural

1,424 possess more than 1,000 peasants.
2,273 possess more than 500 "
16,640 possess more than 100 "
30,417 possess more than 20 "
58,457 possess less than 20 "

The emancipation of these serfs immediately deprives the aristocracy, except in a few cases, of their source of income. The emancipation of these serfs immediately deprive the gristocracy, except in a few cases, of their source of income, and destroys their power and consequence as a body. A few of the nobles who own provinces, and whose factories and mines will pay under free labor, may survive the shock, and even increase in wealth. But the soil was exceedingly productive, yet their custom thousers, at that time, reported not a single arrangement, a but enlarged 'black holes.' Here the congregation of consequence as a body. A few of the nobles who own provinces, and whose factories and mines will pay under free labor, may survive the shock, and even increase in wealth. But the soil was exceedingly productive, yet their custom houses, at that time, reported not a single arrangement, a but enlarged 'black holes.' Here the congregation of consequence as a body. A few of the nobles with own provinces, and whose factories and mines will pay under free labor, may survive the soil was exceedingly productive, yet their custom houses, at that time, reported not a single taking in the poisonous emanations from the bodies of hundreds around. Thousands of un sonstitute their souls' salvation by their bodies' death."

The colonists have at all times affirmed that the soil was exceedingly productive, yet their custom to the sounce of interval; and we understand that wealthy gentlemen in Boston who early distanced their attention to the Amoor, would readily yield up any advantage which they may have a continue, in return for the amount of their invest ments. Nevertheless, the experience thus obtained, only serves to establish the conviction that with such resources at command in the territory of fifteen degrees above zero, of centing their productive dether attention to the Amoor, would readily yield up any advantage which they may have a continue, in the poisonous emanations from the bodies' death."

The clondary the men with least care in wealth to bodies of hundreds around. Thousands of un sonscious martyrs have thus gamed their soulist i

Slavery-Its Origin, Nature, History, We make the following extracts from an argument made by Rev. THORNTON STRINGFELLOW, D. D., of Culpepper, Va. We find it in the Re-

ligious Herald, Richmond, Va.; So far as the capacity of the African has yet dence which sustains this conclusion stares the civilized world in the face, like the sun in the

We hope these will not all life lengthened many years beyond the present speak at once, for if reports are true, the President is all but worried to death by the patriotism of his late supporters.

Russian Possessions on the Amoor. to these exercises; noses get broken and teeth The interest of Americans is directed to that knocked out by balls, and boys get drowned while vast tract generally known as the Valley of the swimming or boating. What if they do? Acci- Amoor, chiefly on account of the extraordinary dents will happen to man, and if a boy is to be effort making by the Russian Government to give kept from all harm he had better be put in a band box. It is better to have a broken nose and No device is neglected which may conduce to the tooth, or two legs, with a full chest and florid settlement and development of this remarkable health, than to have both perfect and die of con- country. Postal and military stations have been sumption, or live a wretched dyspeptic. More are drowned for want of knowledge of watercraft than from accidents in its use. I am a believer in the school of muscular Christianity, so ably advo- either exports or imports; nor are there any lightcated by Dr. Arnold, Chas. Kingsley, and the house or anchorage fees. One effect has been to attract thither a number of foreign traders, who employ steamers to ply on the river, some of Rand made some pertinent remarks—among them provided by Government. Great changes have taken place already; but we are informed on good "When you meet with such cases, sickly dolls, authority, that so far as American merchants (and you will meet with thousands of them) do have undertaken to engage in this new field of not palter with medicines, throw physic and books enterprise, (so attractive when described by the to the dogs, and by fresh air, sunshine, beef, beer facile pen of Mr. Collins, late United States | cently been made on one of the French railroad and exercise, you will make a robust woman of Commercial Agent,) the results have not equaled expectations. The severity of the climate will In allusion to another evil, the speaker thus always be a formidable impediment to success, however favoring may be all other circumstances. As is stated by Mr. Collins, in his recent very in-"Finally, gentlemen, you will have much to do teresting publication, entitled "Travels in the Rein correcting evils of close rooms, both public and private. On first going into a house in which Russian Acquisitions on the confines of India and to another, to the end of the train, where it es is assembled a large party, the senses revolt at China," the Amoor river is sealed up by frost by capes. The fixing and removing of the caoutthe hot and unholsome atmosphere. It is only by use the lungs draw in without effort the filthy but that five months is the only part of the year cility, and the passage of the steam through the point. invisible poison. There is hardly a dozen well which navigation is unobstructed. Of course conduits presents no inconvenience to the passenventilated churches in the country, and many are enterprise is compelled to succomb during

late Chinese province of Manjouria will eventually prove an acquisition to the Russian Empire of no mean pretensions. Mr. Collins, in his new volume, says: "Russia has obtained a territory more valuable than all the supposed cotton districts of Africa, watered by hundreds of streams flowing into the great artery that passes through its entire length. The climate is good and well suited to Europeans; its animals belong to both the cold and warm regions; while its luxuriant herbage and magnificent flora prove that the temperature is neither severe in winter nor excessively hot in summer." Agriculture and cattlebreeding can be carried on to an unlimited extent in a considerable portion of Oriental Siberia, for which reason it is predicted that that country is "destined to have a great future."

More than this, Russia has now got posses

of the great internal water-course, extending more than 2,200 miles from the Pacific to the vast districts of Central Asia, and is the only natural channel of communication. The more perfectly to avail berself of the commercial advantages thus places at her command, the Russian Government, according to a recent letter from St. Petersburg, has concluded a supplementary treaty, with China, which will give access to in land commercial places on the route from Kiatcha to Pekin, (the great channel of internal trade,) and enable Russia to establish factories and consulates on terms equal to those enjoyed by any other nation. The commanding influence hus obtained among the Orientals, taken in connection with the wonderful progress making in to which females are so subject. emancipation of the serfs-the concessions in favor of the Jews-the freedom of the press-is beginning to excite the jealousy of England for her Indian possessions, towards which the domain of the Czar is so rapidly approaching. Some of digestive organs, and restoring the natural elasticity and her statesman conceive that with the object of strength of the whole system. breaking down the supremacy of Great Britain The CEPHALIC PILLS are the result of long investigaing the power of the Sultan; ebtaining control from a deranged state of the stomach. tion of the globe. Viewed in this light, the operations or the Amoor are only one move in the grand gane by which Alexander II aspires to the control of a colossal empire.

It should be stated that American merchants

have received assurances that the Russian Government is ready to extend liberal encouragement in aid of a steam line to connect the amoor with the west coast of America, or with an American line to China; and that London capitalists will aid in an enterprise of this character. Castries Bay, the future port of the Amoor, is closed by ice only three months in the year; and the island of Saghalien, opposite, contsins extensive coal beds adapted to commercial purposes, besides commo-dicus harbors. Additional facts relating to this subject are embraced in an interesting report from the State Department, communicated to the last Congress, in reference to explorations on the Amoor river. The report states:

"Prior to the exploration of Mr. Collins, it was anknown to the commercial world that the Amoor had an butlet into the ocean which could be entered by merchant ships and steamers; and as has been stated, he demonstrated the fact that the Amoor is navigable for steamboats which can ascend more than two thousand miles from the Pacific coast. Already seven American commer cial hotses have been established at Nicolaiosky the commercial port of the Amoor, with which there is now frequent communication by means of ships and steamboats from the ports of the United States. It can be reached by steamboats SPEEDY AND SURE CURE in two days from Hakodada and other ports in Japan, with which a profitable trade has already

This it appears, from a review of the whole subject, that the "course of empire" and of trade points to the coast of Eastern Asia, China and Japanas a field for future commercial enterprise;

As these Testimonials are unsolicited by Mr. Spans, they afford unquestionable proof of the efficacy of this truly scientific discovery. that though there are natural impediments to ex tensive traffic through the Amoor, the resources of that vast region will at length find an outlet to thesea, and contribute to the wealth of our Pacific coast. A sub-marine telegraph across the Behring's Strais is only a question of time.-New York Journal of Commerce.

Mechanic Arts.

INTERIOR OF THE EARTH.-It would appear, from the theory of the earth's constitution now very generally received, that the planet on which PBs, I have received a great deal of benefit from them. from the theory of the earth's constitution now we Ive contains within itself the elements of its own destruction. According to the theory in question, there exists within the outer crust—the coo temperature of which supports animal and vegetable life, and solidifies stone, coal and the various metalic ores—a mass of fluid igneous H. C. Spalding matter. Some of this matter occasionally escapes through the mouth of a volcano, or makes its pills. Send them immediately.

Respectfully yours, earliquake nor the volcano are considered as necessary to prove that fire exists in the center of them exce the earth. On descending beneath the surface, the heat gradually and steadily increases. At the depth of two thousand four hundred and eighty yards water will boil, and lead melts at the depth of eight thousand four hundred yards. There is box of Cephalic Pills. They are truly the best Pills I a sed heat at the depth of seven miles, and by have ever tried. adopting the temperature as calculated from Morveiu's corrected scale of Wedgeworth's pyromete, it is found that the earth is fluid at the depth of one hundred miles. The discharge of melted H. C. Shalding, Esq. earthy matter, called lava, from volcanoes, is I wish for some circulars or large show bills, to brin thought to prove that the mass of the interior of tomers. If you have anything of the kind, please send to tomers. the earth is in a state of fusion, while the hot

perceptible, because the outer crust of the earth EFFECT OF FROST UPON RAILWAY IRONWORK .-The London Enquirer says that, in consequence of the late accidents on the London and Northline have issued instructions for an increase in the time of the fast trains, so as to admit of their frequent stoppage for the purpose of having all the wheels, couplings, driving gear and general machinery examined by inspectors, specially qualified, and who, throughout the continuance the approbation of the Government Inspector, and it is probable that the recent accidents, which constitute, ex causa, a new class of casualty, will lead to scientific inquiry into the whole question of the thermometrical contraction and expansio of itonwork and signals employed upon railways, and which, it is surmised, in many instances, may have been the cause of some hitherto unaccount

THE UNIVERSAL TELEGRAPH.-The London papers enumerate some of the most important results which have resulted from the perfection to which Professor Wheatstone has brought his rapidly increasing. "universal telegraph.' This instrument is so simple in its construction that any person who to use it with certainty. With a few days' prac- be did not know to possess real merit. tice a considerable rapidity can be acquired in sending messages. Without such an instrument as this, a trained establishment of clerks would be necessary to work the telegraph. By its aid, the owner of the telegraph, or any person of ordinary education, can use it with scarcely any training. Some idea of the speed with which this automatic printing telegraph can forward messages may be estimated from the fact that a column of newspaper print, of the usual character, can be transmitted two hundred miles in the brief period of about twenty minutes.

ELECTRICITY CONVERTING SUGAR INTO ALCO nor.-It is well known that the effect of fermentation is to change sugar into alcohol; these two substances being composed of the same elements, but in different proportions-sugar consisting of seventy-two pounds of carbon to nine pounds of drogen and seventy-two of oxygen, while alconol is composed of twenty-four pounds of carbon to six of hydrogen and sixteen of oxygen. At the silting of the Academy of Sciences, at Paris, recently, Mr. Niepce de Saint Victor read a paper giving an account of some experiments which lowel that, under certain circumstances, electricity produced the same effect on sugar as fermentation does, transforming it into alcohol. He found that, by passing an electric current through very sigary white wine, the wine loses all its su gar, and becomes much more alcoholic. On the other hand, the effect of the action of light on absolute alcohol, under certain conditions, is to retransform a portion of the alcohol back into sugar, the alcohol becoming very sugary, and having its strength reduced several degrees.

HEATING RAILWAY CARS.-Experiments with a new system of heating railway carriages, applicable to second and third class vehicles, as well as to those of the first-which have heretofore alone been warmed in cold weather-have relines. According to this new plan, the steam which escapes from the locomotive is carried by a caoutchouc pipe to the first car, and there made to pass through conduits in copper, placed in the roof and the floor, to the end of the vehicle, where it is received into another flexible pipe, and

MEDICAL.

NervousHeadache Headache.

SORTEO NUMERO 1, ESTRAOBDINARIO.

Two Capital Prizes of \$100,000 Each.

In Cases of General Debility, whether the result of acute diseases or of the continued diminution of nervous and muscular energy from chronic complaints, one tried of this restorative has proved successful to an extent which no description or written attestation would render credible.

Invalids so long bed-ridden as to have very nearly become entirely forgotten in their own neighborhoods, have suddenly re-appeared in the busy world, as if just returned from protraced travel in a distant land. Some very signal instances of this kind are attested of female sufferers, emaciated victims of apparent maranus, sanguineous exhaustion, critical changes, and their complication of nervous and dyspeptic aversion to all kinds, and for reasons familiar to medical men, the operation of iron mane.

In Nervous Affections of all kinds, and for reasons familiar to medical men, the operation of iron mane.

In Nervous Affections of all kinds, and for reasons familiar to medical men, the operation of iron mane.

In Nervous Affections of all kinds, and for reasons familiar to medical men, the operation of iron mane.

In Nervous Affections of all kinds, and for reasons familiar to medical men, the operation of iron mane.

In Nervous Affections, without being exciting or over-heating; and gently, regularly aperient, even in the most obstinate cases of continuents.

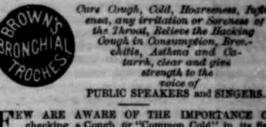

It is this latter property, among others, which makes it so remarkably effectual and permanent a remedy for piles, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms them.

Two Capital Prizes of \$100,000 Each. box of these Chalybeate Pills has often sufficed for the 100,000
